

# VAULT USB HUB

USB Hub with Power Delivery for iPad POS Setups

## Ideal For

- ▷ Retail counters
- ▷ Restaurants & cafés
- ▷ Hospitality checkouts
- ▷ Kiosk and fixed POS deployments

**HUB-NOA** keeps your iPad powered, connected, and ready for business—no matter how busy the shift gets.

The VAULT USB Hub for iPad is designed to expand the capabilities of your iPad-based POS system while keeping your device powered throughout the day. With built-in Power Delivery, the hub charges your iPad while supporting multiple peripherals—making it ideal for high-traffic retail and restaurant environments.

Engineered for reliability, USB Hub for iPad adds multiple USB connections and a wired Ethernet port to deliver stable performance for essential POS accessories like receipt printers, barcode scanners, and cash drawers.

## Features include:

- ▷ **Power Delivery Charging**  
Charge your iPad while connected peripherals remain in use—no downtime, no compromises.
- ▷ **Expanded Connectivity**  
Adds up to 3x USB-A ports and USB-C support to connect multiple POS peripherals simultaneously.
- ▷ **Wired Ethernet Port**  
Provides a more stable, secure internet connection than Wi-Fi—critical for transaction-heavy environments.
- ▷ **POS-Ready Design**  
Optimized for retail and restaurant use cases, including Lightspeed POS and similar systems.
- ▷ **Stand & Counter Friendly**  
Pairs seamlessly with VAULT iPad stands and enclosures for clean, professional installations.

## Tech Specs
